Bulletin # 3
Fall Board 2011

Are you ready for a spook-tacular year? There are many exciting adventures arriving with the announcement of Fall this year for Juniors across the state of Florida, including Fall Board, District get-togethers, and best of all, Southern Region! While each of these events will have its own individual uniqueness, we still need to be on the road to collaborating within our community to perform service projects incorporating acts of conservation.

As a society, we are trying to become more “green” so that the generations after us have a chance for survival. This upcoming year, we are striving to perform more collaborative service projects within our clubs. We hope that you are able to include ways to make this possible in each of your clubs. A few splendid ideas would be: holding a program at a club meeting to discuss ways to conserve within your individual lives; starting a recycling unit within your club where you can bring in paper, plastic, etc for a club member to take to the local recycling plant; planting a tree for Arbor Day; or even cleaning up a local park allowing the community to enjoy the full experience of the park. I am positive that within your clubs, you will come up with new innovative ways to report for Conservation this year, and I look forward to reading them!

Speaking of reporting, a few things that Candice and I will be looking for this year will be explanations to the projects that you participate in. All of you had fabulous things that you were doing in your club and around your community, but sometimes it was hard for us to justify the correlation between the hours put in and the name of the project. The report needed just a few more details for us to really comprehend the extent you went to with your project. We really would like you to continue receiving as many points as possible, so please be sure to give us a few specifics as to what exactly your club did!

Keep up all the hard work that we know each of you are doing in your area and we are looking forward to seeing all of you at Fall Board for another JAM Session with hands-on activities!
