The reporting was very informative and I was happy to see how many clubs did have a mini LEADS workshop. Please continue to do this.

I want to present a “new” Leadership program that I would like all the clubs to take part in. It is based on what was done in one of the clubs in Georgia. It is very simple. Have all your new members (however you define that) gather with the President and Vice President for a question and answer time. At this meeting the new members are tasked with designing, organizing, and funding this event. You may want to assign them a seasoned member as a mentor. The purpose of this is to allow the new members to work as a group to bring the project full circle, from creativity to completion, while learning about the club and developing their own Leadership style.

I am always here to help you in whatever way possible. PLEASE do not hesitate to contact me. I know this is going to be even a better year than last!!!
